B) Stress Bars 栋纹

i) No. of Bars 栋纹之数量

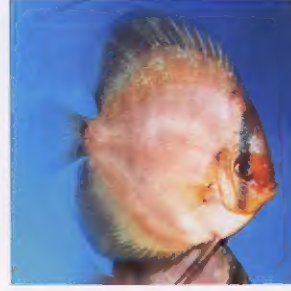

0 Bar

无栋

1 Bar

1 栋

2 Bars

2 栋

9 Bars

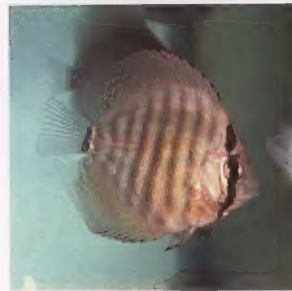

9 栋

14 Bars

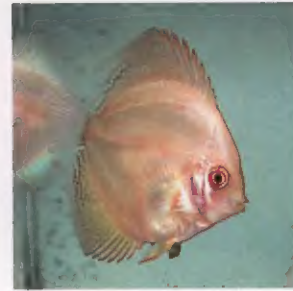

14 栋

ii) Stress Bar Colours 栋纹之颜色

Black

黑

Beige

奶黄

Cream

奶白

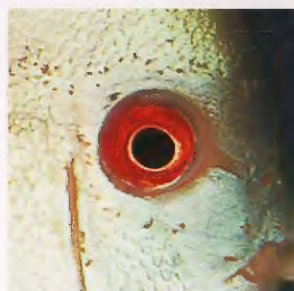

Gray

灰

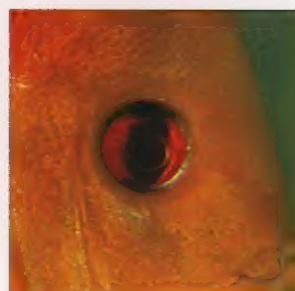

C) Eye 眼睛

i) Eye-ring Shapes 眼圈形状

Round

全圆

Semi-round

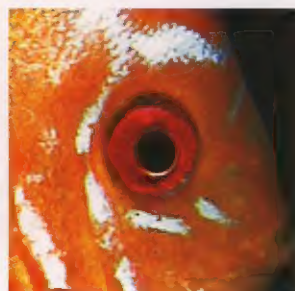

半圆

ii) Eye-ring Colours 眼圈颜色

Dark red

深红

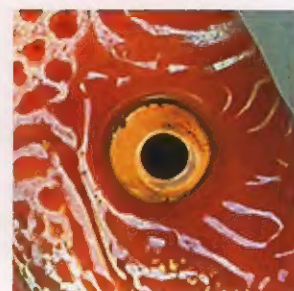

Red

鲜红

Orange

橙

Yellow

黄

Cream

奶白

iii) Eyeballs Colour 眼球颜色

Black

黑

Maroon

褐色

D) 'D' Area 'D' 部位

Area that excludes Head, Dorsal and Anal fins.

除了背鳍，臀鳍，尾鳍及头部的部位。

'D' Area

'D' 部位

E) Markings 条纹

i) Solid - Only 1 colour at the 'D' area

i) 全色 - 在鱼只的 'D' 部位只有单一一种颜色

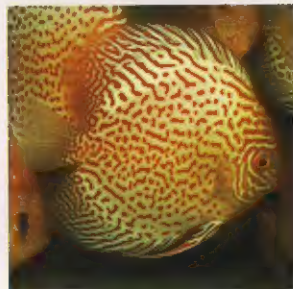

ii) Pattern - Different shades of Blue Green combined with another colour at the 'D' area.

ii) 花纹 - 在鱼只的 'D' 部位有不同的蓝绿色再搭配另外一种颜色。

Solid

全色

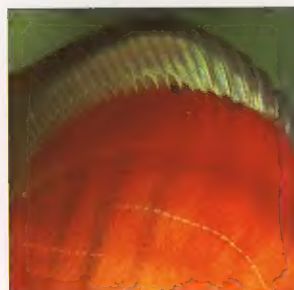

Pattern

花纹

F) Rim 鳍框

Some varieties will develop a rim on both the Dorsal & Anal fins.

有些种类会在背鳍及臀鳍部份出现鳍框。

Rim

鳍框

G) Breeding 繁殖法

There are two ways of cross breeding the Discus.

有 2 种七彩的交配繁殖方法：

i) Out Cross

Breeding a pair of fish where both parents are from different varieties.

杂交

2 条亲鱼都是来自不同的种类。

Golden

Tips for Happy Discus Keeping 健康七彩饲养小贴士

Knowing more about Discus varieties will increase your appreciation of the fish. Success in maintaining the health of your Discus will provide for greater enjoyment. Below are some tips to keep a healthy Discus:

- 1) Quarantine - Newly bought discus are prone to the 'Discus Black Disease'. An attack is obvious when most of the Discus fish in the aquarium stack together or rub against objects, and their bodies turn black and the fin become cloudy. This disease spreads rapidly, therefore, newly bought Discus must not mix immediately with the existing fish in your aquarium. In the event of an outbreak, appropriate treatment must be carried out immediately to prevent serious damage or mortality.
- 2) Discus fish are very vulnerable to internal parasitic infections when they are exposed to low water temperatures. The symptoms are pale body colours, loss of appetite, a thin body, white feces or long feces. Regular de-worming with effective medication will ensure your discus grow bigger, faster, healthier and more colourful.

- 3) Problems like cloudy fins, cloudy eyes, folded fins and excessive mucus are very common in Discus fish. These are symptoms of a bacteria infection due to poor water quality. Treatment with appropriate medication will eliminate the problem. Remember not to overfeed or overcrowd your fish.
- 4) When Discus fish keep scraping against objects and twisting their head, it is a sure sign of an external parasitic infection. It can lead to a more serious problem if left unattended. Proper treatment will eliminate the parasites.

There are many remedies for ornamental fish that are available in the market. Unfortunately, not all remedies are effective for treating Discus. Using those that are specially formulated for Discus will ensure the success of your treatment.

七彩神仙鱼的种类令人陶醉和格外珍惜，能够成功栽培出健康的「宝贝」，更是令人满足和享受无穷的乐趣。以下是一些秘诀和贴士：

- 1) 刚购入的七彩神仙鱼很容易感染上“黑死病”。其征状为所有鱼只紧迫在一块，鳍部白朦及紧缩，不停的摩擦缸底，体色转黑而且迅速的传染。因此别马上将新购入鱼只参入旧鱼一起饲养。如有任何发病征状，应即刻采取有关步骤及治疗，以便把损伤及死亡率减至最低。
- 2) 当水温太低时，七彩神仙鱼非常容易受体内寄生虫的感染。其征状为鱼只体色苍白，没有食欲，体形消瘦，甚至拉白便或长便。定期为鱼只驱虫，确保鱼只长的更快，更大，更健康及颜色更艳丽。
- 3) 疾病征状如鳍部及眼部朦白，鳍部紧缩及体表产生大量黏液，在七彩里是非常常见的。这些细菌性感染的原因不外是水质恶劣所引起的。正确的治疗可轻易的解决以上的问题，切记千万别过量喂食或饲养太密。
- 4) 当发现鱼只鳍部紧缩，不停的摩擦缸底或是摆动头部，很有可能它已被体外寄生虫感染。如果没有及时治疗那问题可能会变得更复杂。有效的药物将能驱除这些寄生虫。

市面上观赏鱼的药物种类非常繁多，但是，不是每种药都对七彩神仙鱼有效。为了达到预期的疗效，应该使用专为七彩神仙鱼配制的药物。

Products Information 产品资讯

AquaCare range of products is specially formulated to overcome the Discus health problems. With its mild, yet effective properties, problems can be solved easily without causing damages to the fish.

AquaCare 系列产品是专为处理日益严重的七彩疾病所研制而成的。其温和却有效的成份把处理七彩疾病变成简单又容易而且也不伤害鱼只。

Black Disease
Treat "Black Disease",
fungus, Velvet disease,
Costia disease & diseases
cause by bacteria.

黑死病克星
防治黑死病，口丝虫，
卵圆鞭毛虫，三代虫，
霉菌及细菌性疾病。

Tape Worm
Remove Tape Worm,
Metacercaria &
Sanguinicola.

条虫克星
驱除体内寄生虫如：
吸虫，条虫及心形虫。

Internal Parasite
Remove intestine flagellates
& worms like: Hexamita,
Roundworms, Capillaria &
Threadworms.

体内寄生虫
驱除体内寄生虫如：
鞭毛虫，钩虫，线虫及蛔虫。

External Parasite
Treats skin protozoans,
worms & fungus like:
Argulus, Ergasilus, Lernaea,
Dactylogyrus, Gyrodactylus,
Ichthyophthirius, Trichonina,
Chilodonella & Fungus.

体外寄生虫
防治体外寄生虫及霉菌如：
鳃吸虫，鞭毛虫，东轮虫，
钟形虫，鱼虱及霉菌。

Bacteria Treatment
Treat disease cause by
bacteria like : Pseudomonas,
Aeromonas, Vibrio,
Trichomonas, Coccidia.

细菌克星
防治格兰氏阴性及阳性细菌
所引起的疾病。

Brown 'D' Area
棕色的'D'部位

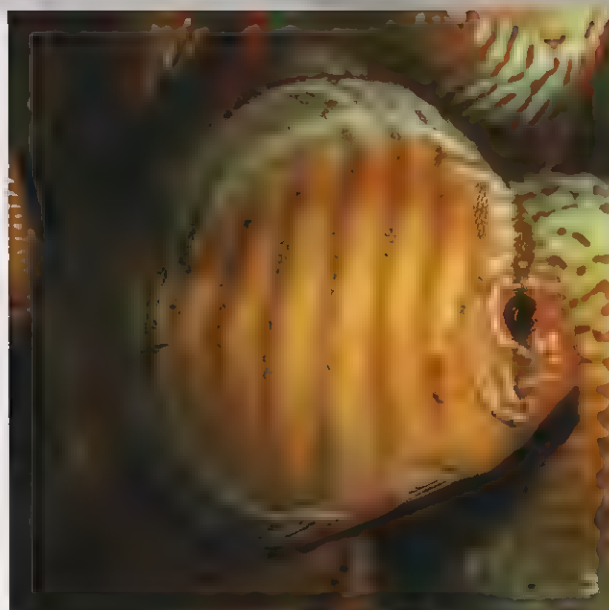

Common Name	Brown
Primary Colour	Brown
Secondary Colour	Blue Green
Number & Colour of Stress Bar	9 Black
Shape & Colour of Eye-ring	Semi-round Red

通用名称	棕七彩
早期颜色	棕色
后期颜色	蓝绿色
栋纹数量及颜色	9条黑色
眼圈形状及颜色	半圆红色

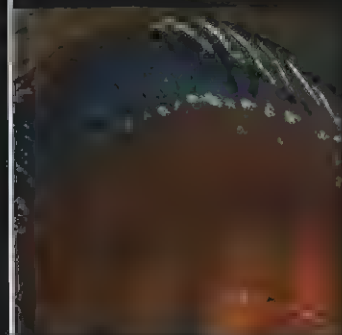

Characteristics 特征

- 1) It has a Brown shade on the 'D' area with some Blue Green stripes on the forehead, and on both the Dorsal & Anal fins.
- 2) The stripes on the forehead are normally horizontal.
- 3) A Dark Blue Green rim may appear on both the Dorsal & Anal fins (Pix 2, 3 & 4).
- 1) 拥有棕色的‘D’部位，在头部、背鳍及臀鳍则有蓝绿色条纹
- 2) 头部条纹通常呈平行
- 3) 深蓝绿色框或出现在背鳍及臀鳍的部位(图二，三及四)

Dark Blue Green Rim
深蓝绿色框

Common Name
Primary Colour
Secondary Colour

Alenquer Red
Brown
Blue Green, Yellow
& Red

Number & Colour of Stress Bar
Shape & Colour of Eye-ring

9 Black
Semi-round Red

通用名称 : 阿莲卡红 / 一片红
早期颜色 : 棕色
后期颜色 : 蓝绿色、黄色及红色
栋纹数量及颜色 : 9条黑色
眼圈形状及颜色 : 半圆红色

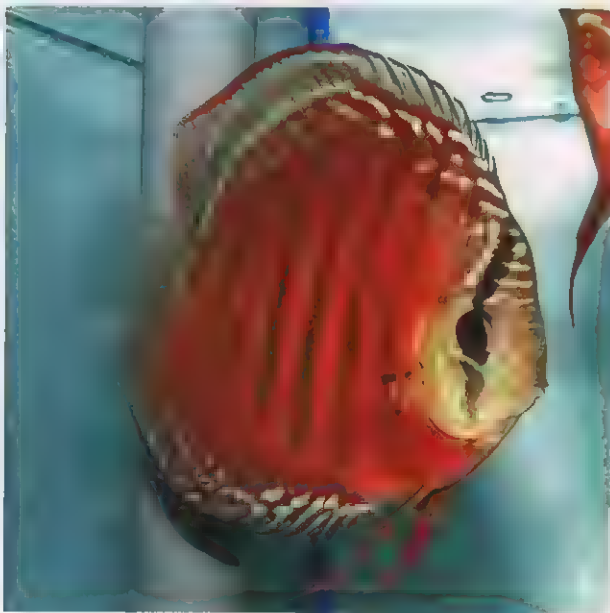

Characteristics 特征

- 1) It has a Dark Red shade on the 'D' area with some Blue Green stripes on the forehead, and on both the Dorsal & Anal fins.
- 2) The stripes on the forehead are normally horizontal.
- 3) Some specimens have a more yellow base (Pix 3).
- 4) A Dark Blue Green rim may appear on both the Dorsal & Anal fins.
- 5) Most specimens have a strong eye bar and semi round eye-rings.
- 6) Majority of the females are redder than the males.

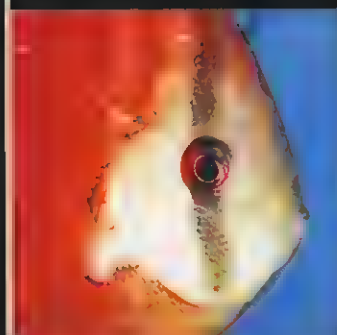

- 1) 拥有深红的'D'部位，在头部、背鳍及臀鳍则有蓝绿色条纹
- 2) 头部的条纹通常是平行的
- 3) 有些个体拥有较黄的底色(图三)
- 4) 由于野生的基因，深蓝绿色框或出现在背鳍及臀鳍的部位
- 5) 大多数的个体都在眼部拥有条明显的黑色栋纹及半圆的眼圈
- 6) 雌鱼普遍上会比雄鱼红

No Stripes

无条纹

Common Name	Virgin Red
Primary Colour	Brown
Secondary Colour	Blue Green & Red
Number & Colour of Stress Bar	9 Black
Shape & Colour of Eye-ring	Semi-round Red

通用名称	处女红
早期颜色	棕色
后期颜色	蓝绿色、黄色及红色
栋纹数量及颜色	9条黑色
眼圈形状及颜色	半圆红色

Characteristics 特征

- 1) A Dark Red 'D' area with no stripes on the body is the unique feature of this variety.
- 2) The red appears as Dark Red because of its brown base.
- 3) Majority of the females are redder than the males.
- 4) A Dark Blue Green rim may appear on both the Dorsal & Anal fins.
- 5) Some specimens have a Dark Blue face.

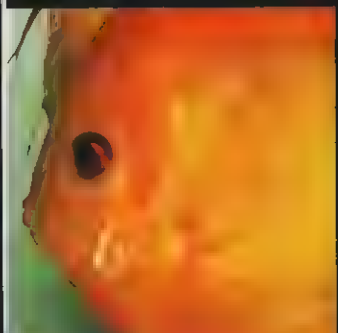

- 1) 全无条纹，拥有深红色的‘D’部位是它的特征
- 2) 基于棕色的底色，它的红色较偏向深红色
- 3) 雌鱼普遍上比雄鱼红
- 4) 深蓝绿色框或出现在背鳍及臀鳍的部位
- 5) 有些个体或出现蓝色的脸部

More Yellow Base Colour

较黄的底色

Common Name
Primary Colour
Secondary Colour

Rose Red
Brown
Blue Green, Yellow
& Red
9 Black
Semi-round Red

Number & Colour of Stress Bar
Shape & Colour of Eye-ring

通用名称 玫瑰红
早期颜色 棕色
后期颜色 蓝绿色、黄色及红色
栋纹数量及颜色 9条黑色
眼圈形状及颜色 半圆红色

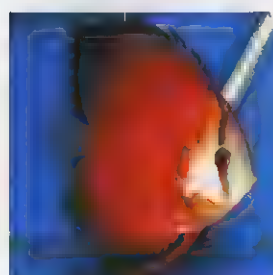

Characteristics 特征

- 1) A brighter red body without any stripes is the characteristic of this variety.
- 2) It has a more yellow base.
- 3) A Dark Blue Green rim is visible on both the Dorsal & Anal fins.
- 4) Some specimens have some stripes on the gill cover.

- 1) 无条纹但较明亮的红色身体是其特征之一
- 2) 拥有较黄的底色
- 3) 深蓝绿色框或在背鳍及臀鳍部位出现
- 4) 有些个体或在鳃盖部位有些蓝绿色条纹

通用名称：血红
早期颜色：棕色
后期颜色：蓝绿色，黄色及红色
栋纹数量及颜色：9条黑色
眼圈形状及颜色：半圆鲜红色

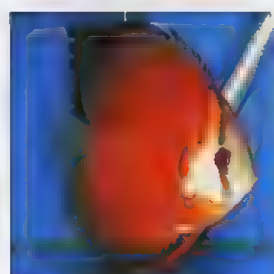

Characteristics 特征

- 1) This variety has a very unique blood red shade on the 'D' area with no stripes on the rest of the body.
- 2) Its bright red eye-rings are its other trademark.
- 3) It has a very stable red brown base that does not fade easily even when under stress.

- 1) 在'D'部位拥有非常独特的血红色，全身全无条纹
- 2) 鲜红色眼圈是它另一个特点
- 3) 拥有非常稳定的棕红色，在紧迫的情况之下也不轻易褪色

Solid Colour With Some Stripes
全色少量条纹

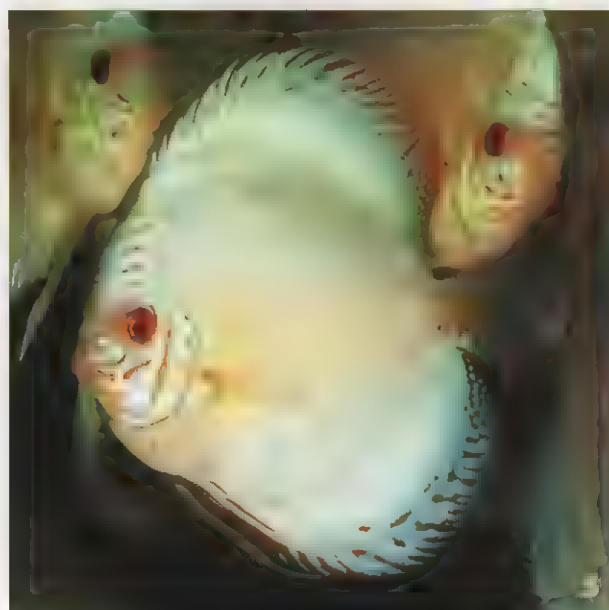

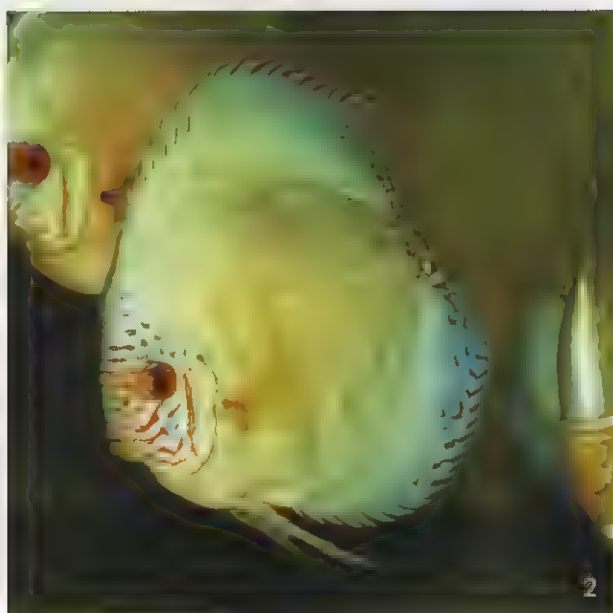

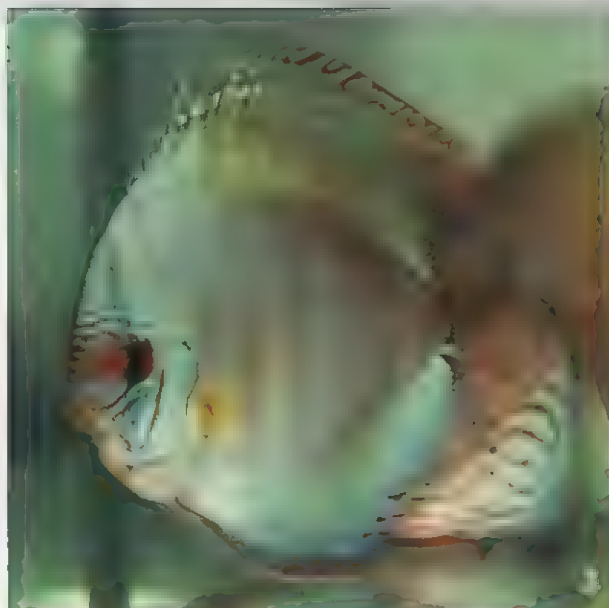

Common Name	Cobalt
Primary Colour	Brown
Secondary Colour	Blue Green
Number & Colour of Stress Bar	9 Black
Shape & Colour of Eye-ring	Semi-round Red

通用名称	一片蓝
早期颜色	棕色
后期颜色	蓝绿色
栋纹数量及颜色	9条黑色
眼圈形状及颜色	半圆红色

Characteristics 特征

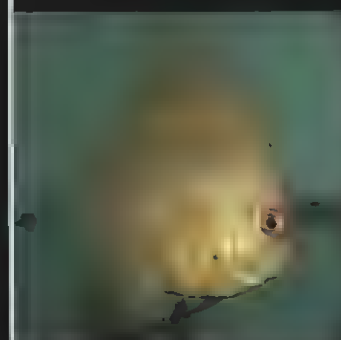

- 1) A Blue Green shade covers the whole body except for the head, Dorsal and Anal fins.
- 2) There are some stripes on the edge of both the Dorsal & Anal fins.
- 3) Stripes that are visible during the juvenile stage will be covered up when the fish matures.

- 1) 除了头部、背鳍及臀鳍，全身都被蓝绿色覆盖着
- 2) 其背鳍及臀鳍边或有少量的条纹
- 3) 幼鱼时期出现在身上的条纹将在成长后消失

Juvenile
幼鱼

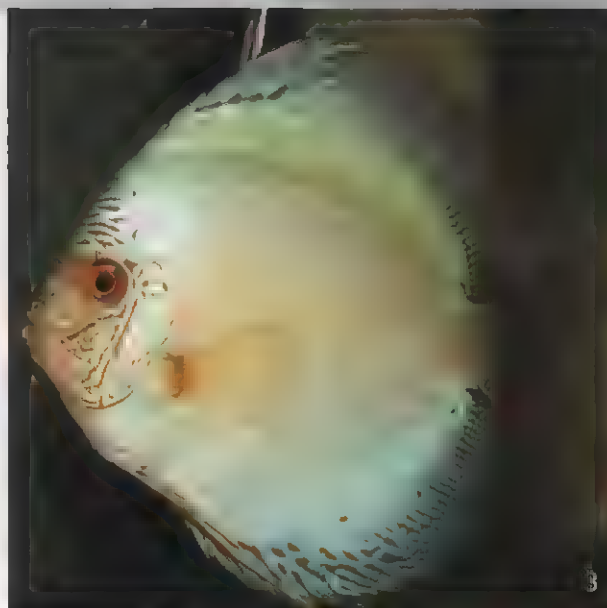

Common Name	Barless Snake Skin
Primary Colour	Brown
Secondary Colour	Blue Green
Number & Colour of Stress Bar	0
Shape & Colour of Eye-ring	Round Red

通用名称	无栋蛇纹
早期颜色	棕色
后期颜色	蓝绿色
栋纹数量及颜色	无
眼圈形状及颜色	全圆红色

Characteristics 特征

- 1) A Bright Blue Green shade covers the whole body except for the head, and both the Dorsal & Anal fins.
- 2) Very fine and compact stripes are noticeable on the forehead or on both the Dorsal & Anal fins.
- 3) It is typical of this variety to have no stress bars.
- 4) There are two variants: Variant 1 - Blue
(Pix 1, 2, 3 & 4)
Variant 2 - Red (Pix 5)
- 5) The blue variant has stronger Blue Green stripes.
- 6) The red variant has a stronger red base with uneven blue stripes.

- 1) 除了头部、背鳍及臀鳍，全身被亮丽的蓝绿色覆盖着
- 2) 头部、背鳍及臀鳍部位有明显的超细紧密条纹
- 3) 它全无栋纹
- 4) 共有两种型态: a) 蓝蛇(图一，二，三及四)
b) 红蛇(图五)
- 5) 蓝蛇拥有较强的蓝绿色条纹
- 6) 红蛇拥有较强的红底色及不平平均的蓝绿色条纹

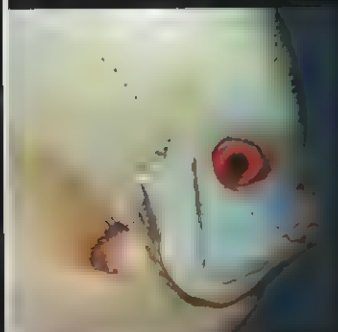

BBS 3(a)

Solid Colour without Stripes
全色无条纹

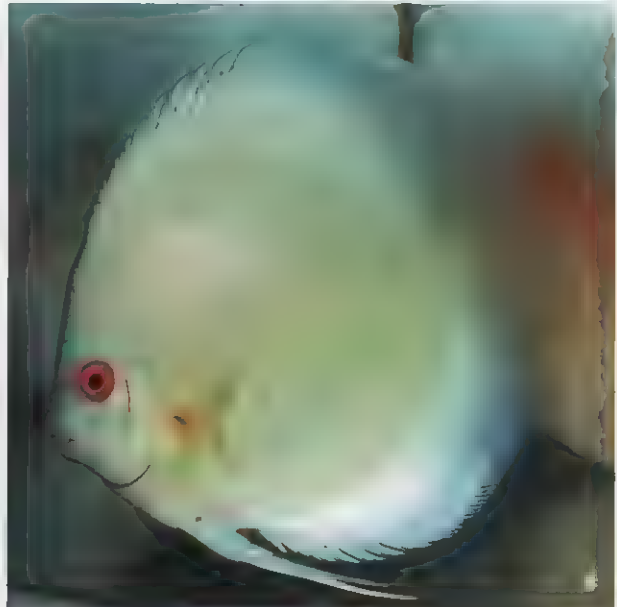

Common Name	Blue Diamond
Primary Colour	Brown
Secondary Colour	Blue Green
Number & Colour of Stress Bar	0 or 1 Black
Shape & Colour of Eye-ring	Round Red or Orange

通用名称	蓝礁 / 天子兰
早期颜色	棕色
后期颜色	蓝绿色
栋纹数量及颜色	无或1条黑色
眼圈形状及颜色	全圆红色或橙色

Characteristics 特征

- 1) An even shade of bright Blue Green without any stripes on the body is the unique feature of this variety.
- 2) Some specimens do not have any stress bars whereas some have the last stress bar near the tail.
- 3) Solid red eye-rings are typical of this variety but some specimens only have orange eye-rings.
- 4) Some specimens have an extra high body (Pix 1).

- 1) 全无条纹及全身覆盖着亮丽的蓝绿色, 乃其特别之处
- 2) 有些个体全无栋纹, 但有些则在靠近尾部有一条黑色栋纹
- 3) 全红的眼圈是首选, 但有些个体只拥有橙色眼圈
- 4) 有些个体会出现超高的身体(图一)

BBS 3(b)

Dark Blue Green Colour
深蓝绿色

Common Name	Blue Cover
Primary Colour	Brown
Secondary Colour	Dark Blue Green
Number & Colour of Stress Bar	0 or 1 Black
Shape & Colour of Eye-ring	Round Red or Orange

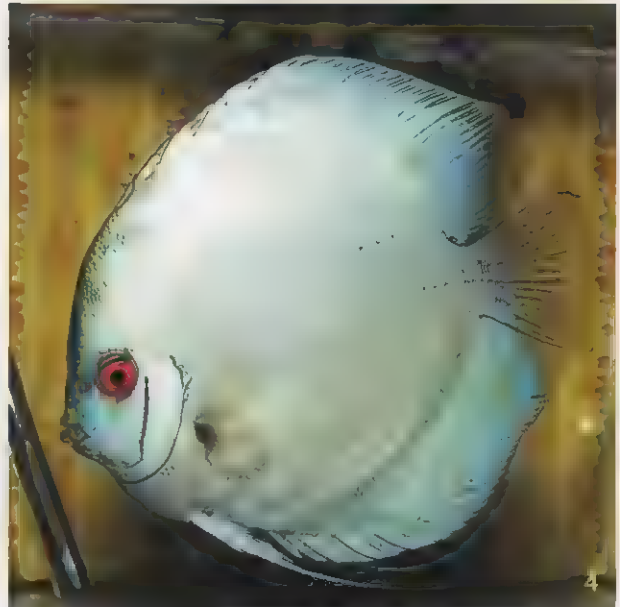

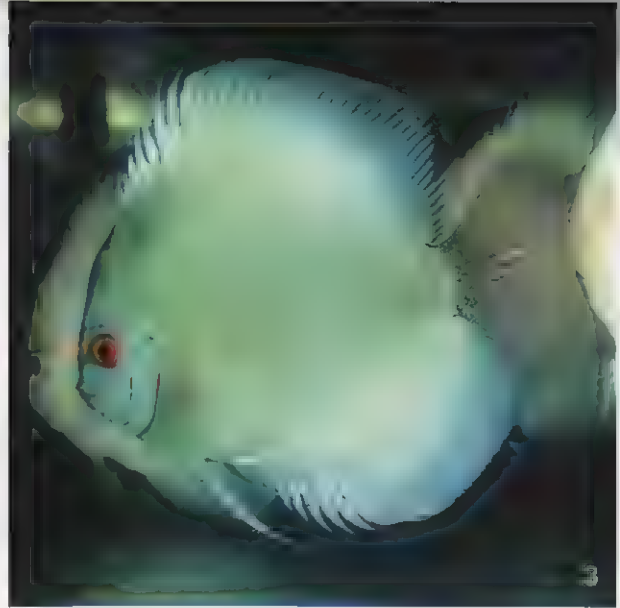

通用名称	蓝盖
早期颜色	棕色
后期颜色	深蓝绿色
栋纹数量及颜色	无或1条黑色
眼圈形状及颜色	全圆红色或橙色

Characteristics 特征

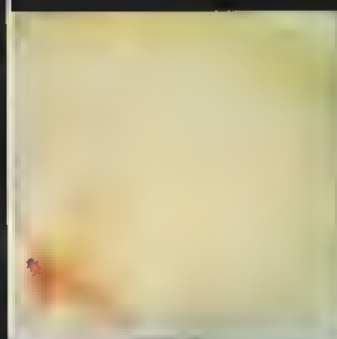

- 1) This variety has a Dark Blue Green shade on the body.
- 2) There are no stripes on the head or the Dorsal & Anal fins.
- 3) The colour of the eye-rings is normally dark red.
- 4) Some specimens have the last stress bar near the tail.

- 1) 拥有深蓝绿色的色泽
- 2) 全身无条纹
- 3) 眼圈通常是深红色
- 4) 有些个体在靠近尾部有条黑色栋纹

Green Blue Colour
绿蓝色

Common Name	Ocean Green
Primary Colour	Brown
Secondary Colour	Green Blue
Number & Colour of Stress Bar	0 or 1 Black
Shape & Colour of Eye-ring	Round Red or Orange

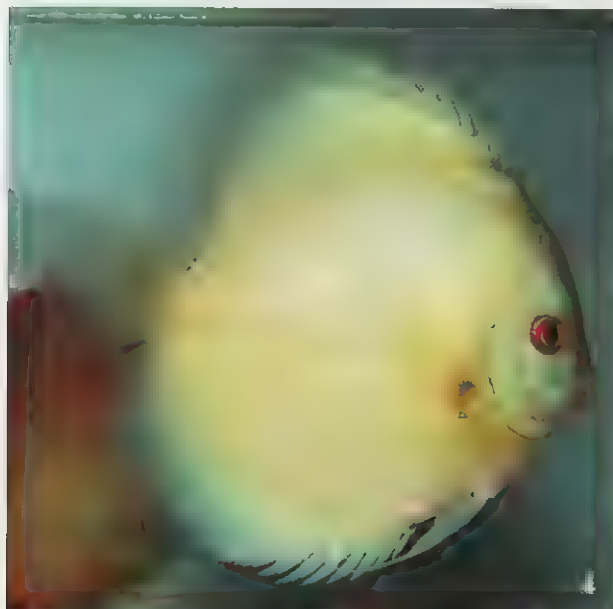

通用名称	海洋绿
早期颜色	棕色
后期颜色	绿蓝色
栋纹数量及颜色	无或1条黑色
眼圈形状及颜色	全圆红色或橙色

Characteristics 特征

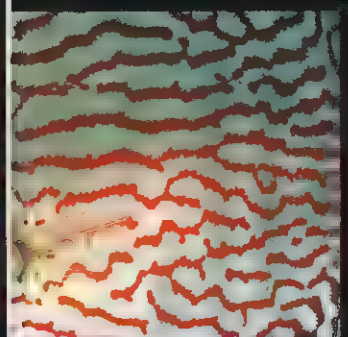

- 1) This variety has a Green Blue shade on the body.
- 2) The eye-rings may be red, orange or yellow.
- 3) Some specimens have the last stress bar near the tail and semi-round eye-rings (Pix 5).

- 1) 全身覆盖着独特的绿蓝色
- 2) 眼圈是红色，橙色或是黄色
- 3) 有些个体在靠近尾部有条黑色栋纹及拥有半圆的眼圈(图五)

Blue Green Stripes with Red Base
棕红底色配搭蓝绿色条纹

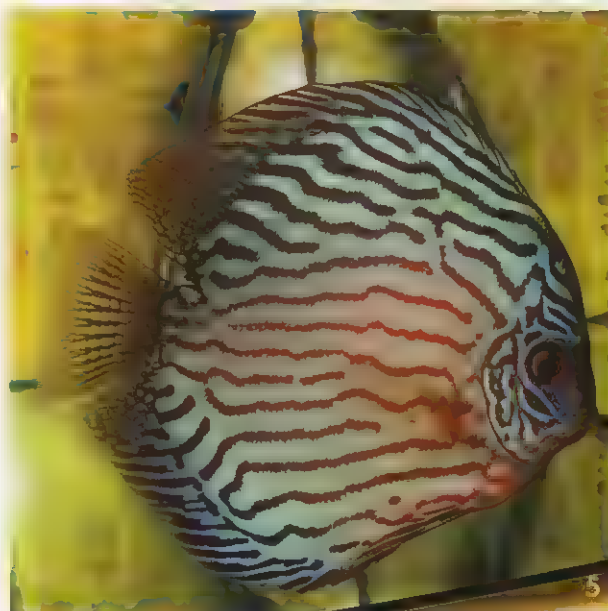

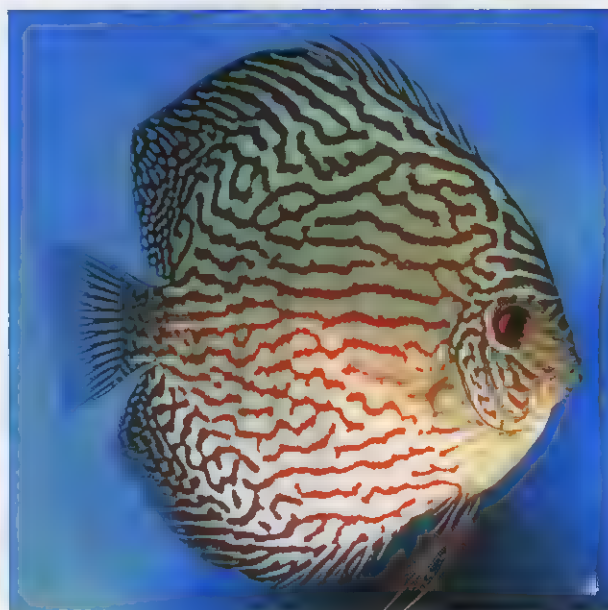

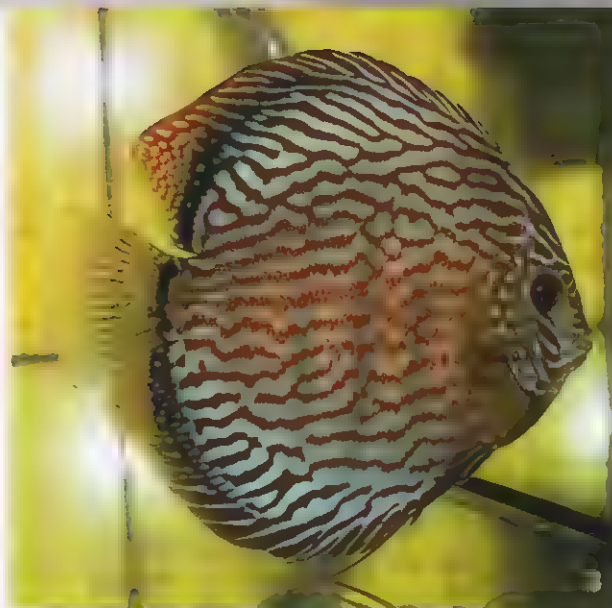

Common Name	Red Turquoise Classic
Primary Colour	Brown
Secondary Colour	Blue Green & Red
Number & Colour of Stress Bar	9 Black
Shape & Colour of Eye-ring	Semi-round Red

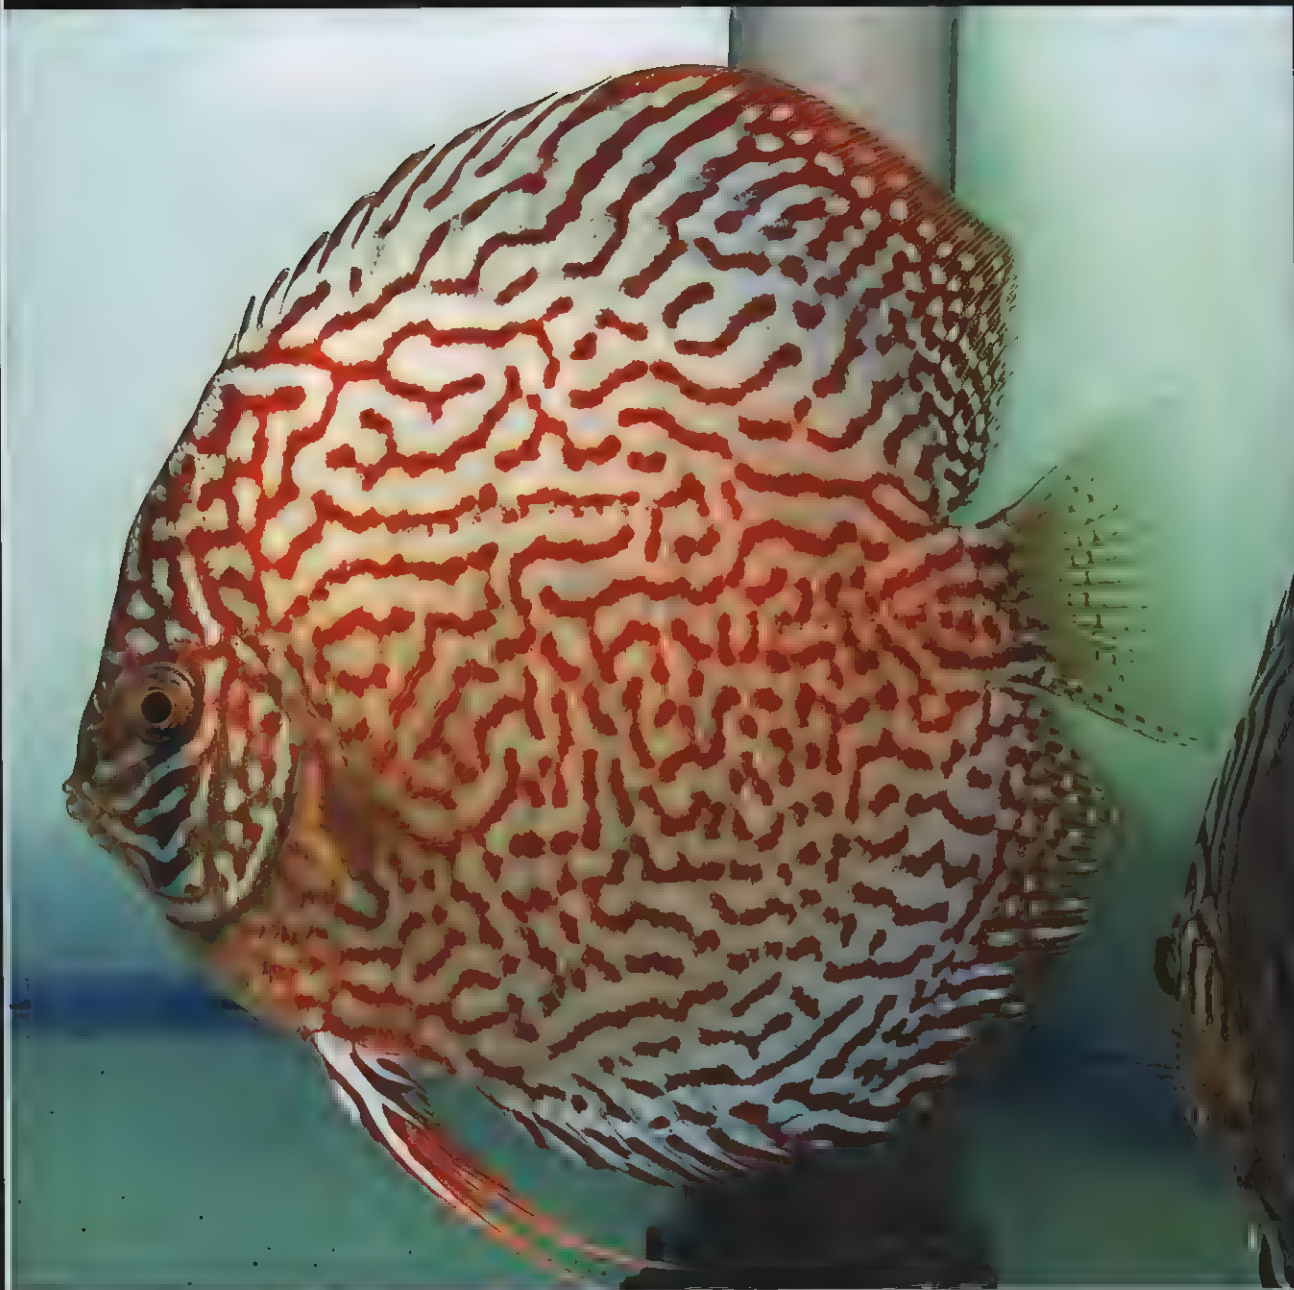

通用名称	传统红松石
早期颜色	棕色
后期颜色	蓝绿色及红色
栋纹数量及颜色	9条黑色
眼圈形状及颜色	半圆深红色

Characteristics 特征

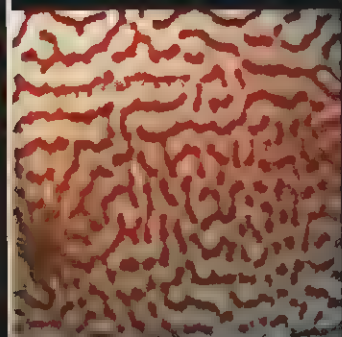

- 1) Blue Green stripes with a red base are prominent features of this variety.
- 2) Some specimens have more red whereas others have more blue.
- 3) Some specimens may have a very attractive combination of contrasting blue & red (Pix 4).

- 1) 棕红的底色配搭蓝绿色条纹是此种类最特出之处
- 2) 有些个体较红但有些则较蓝
- 3) 有些个体有非常强烈对比的蓝色与红色(图四)

Shape & Colour of Eye-ring	Semi-round Red

通用名称	电光七彩
早期颜色	棕色
后期颜色	蓝绿色
栋纹数量及颜色	9条黑色
眼圈形状及颜色	半圆深红色

Characteristics 特征

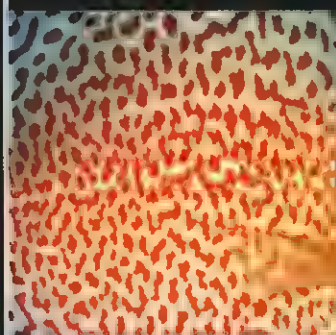

- 1) This variety has bright Blue Green stripes with a brown base.
- 2) The eye-rings are normally very bright & red.
- 3) Some specimens may have a simple horizontal pattern (Pix 5).

- 1) 拥有棕底及非常光亮的蓝绿色条纹
- 2) 眼圈通常非常红及明亮
- 3) 有些个体有平行的条纹(图五)

Irregular Red Spots
不规则红点

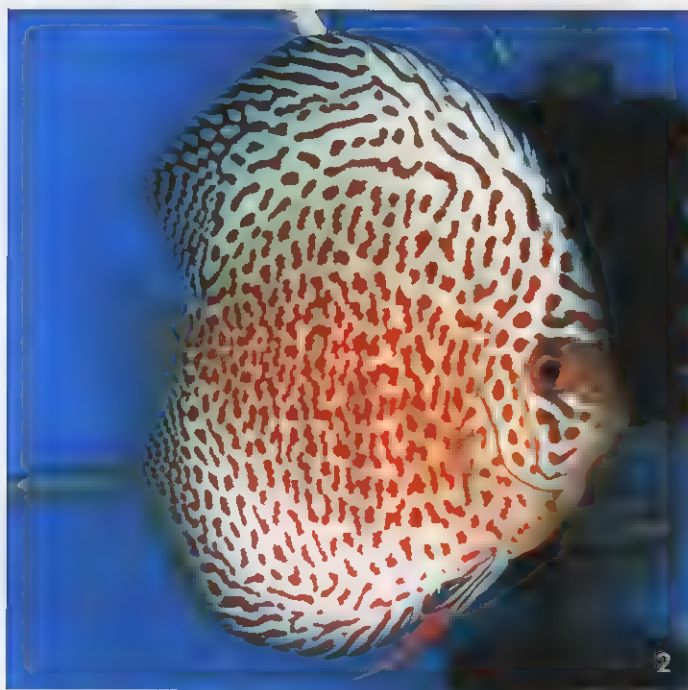

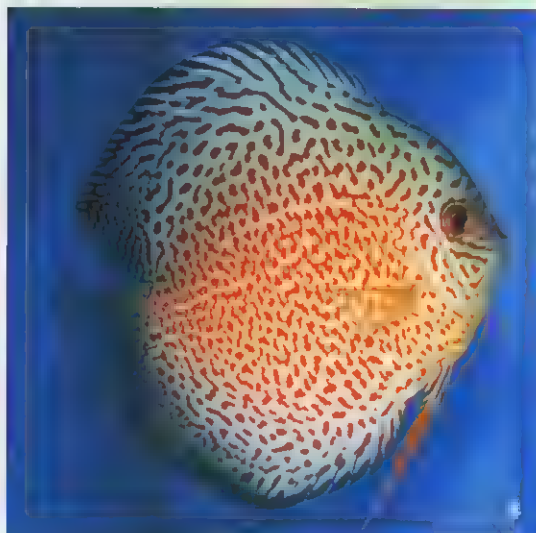

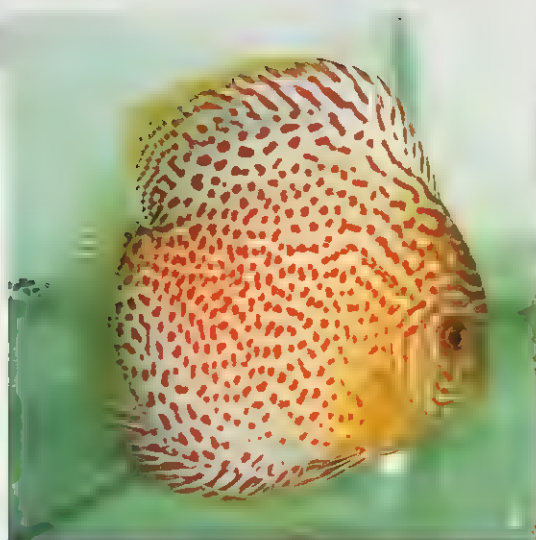

Common Name	Leopard Skin (Spot)
Primary Colour	Brown
Secondary Colour	Blue Green & Red
Number & Colour of Stress Bar	9 Black
Shape & Colour of Eye-ring	Semi-round Red or Orange

通用名称	豹纹(点)
早期颜色	棕色
后期颜色	蓝绿色及红色
条纹数量及颜色	9条黑色
眼圈形状及颜色	半圆红色及橙色

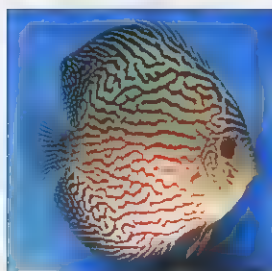

Characteristics 特征

- 1) A Blue Green shade with more irregular red spots than lines covers the body of this variety.
- 2) Some specimens have spots on the gill plate (Pix 1, 2 & 4).
- 3) Some specimens have weaker pigmentation on the head area (Pix 3 & 5).

- 1) 全身覆盖着较多的不规律红点
- 2) 有些个体的红点已伸展至腮盖(图一，二及四)
- 3) 有些个体头部的色泽较弱(图三及五)

Characteristics 特征

- 1) This variety has some Green Blue stripes on the head and on both the Dorsal & Anal fins.
- 2) Fine spots normally appear on the 'D' area and occasionally on the Anal fin.
- 3) Most specimens develop a yellow belly as they mature.
- 4) A prominent eye bar may be seen even when the fish is adult.
- 5) Most specimens have some horizontal stripes on the shoulders of fish.
- 6) Some of the spots are red but they are usually orange.
- 7) A Dark Blue Green rim may appear on both the Dorsal & Anal fins.

- 1) 在头部、背鳍及臀鳍有绿蓝色的条纹
- 2) 喷点通常出现在'D'部位，但偶而会出现在臀鳍上
- 3) 成长后，大部份都有黄色的腹部
- 4) 眼部有条明显的黑色栋纹(成鱼也如此)
- 5) 大部份个体背部都有平行的条纹
- 6) 有些喷点是红色，但大致上为橙色
- 7) 深蓝绿色框或出现在背鳍及臀鳍的部位

Characteristics 特征

- 1) This variety has some Green Blue stripes on the head and on both the Dorsal & Anal fins.
 - 2) The stripes are normally more complex.
 - 3) Finer spots develop on the 'D' area or sometimes on the Anal fin.
 - 4) The eye bar is not so prominent and there are no clear horizontal stripes.
 - 5) Some of the spots are red but they are usually orange.
 - 6) A Dark Blue Green rim may appear on both the Dorsal & Anal fins.
- 1) 在头部、背鳍及臀鳍有绿蓝色的条纹
 - 2) 拥有较复杂的条纹
 - 3) 斑点大都集中在'D'部位，但偶而会出现在臀鳍上
 - 4) 眼睛部位无明显的黑色栋纹，身体也无明显的平行条纹
 - 5) 有些斑点为红色，但多数是橙色
 - 6) 深蓝绿色框或出现在背鳍及臀鳍的部位

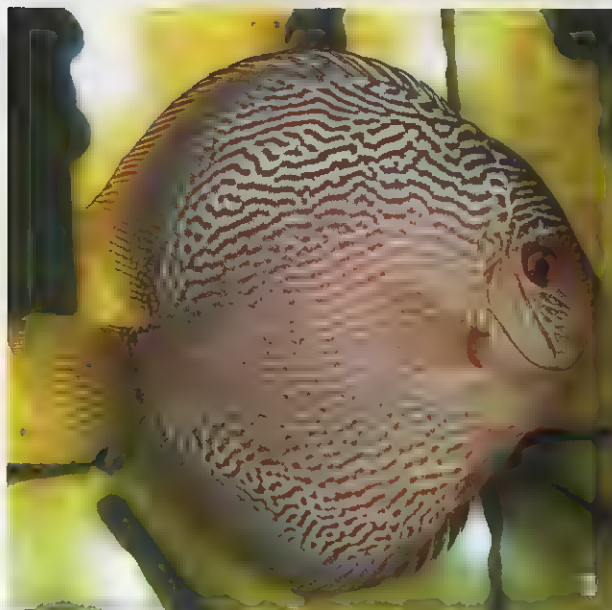

Fine Stripes with Red Base
红底幼细条纹

Common Name	Red Snake Skin
Primary Colour	Brown
Secondary Colour	Blue Green & Red
Number & Colour of Stress Bar	14 Black
Shape & Colour of Eye-ring	Semi-round Red or Orange

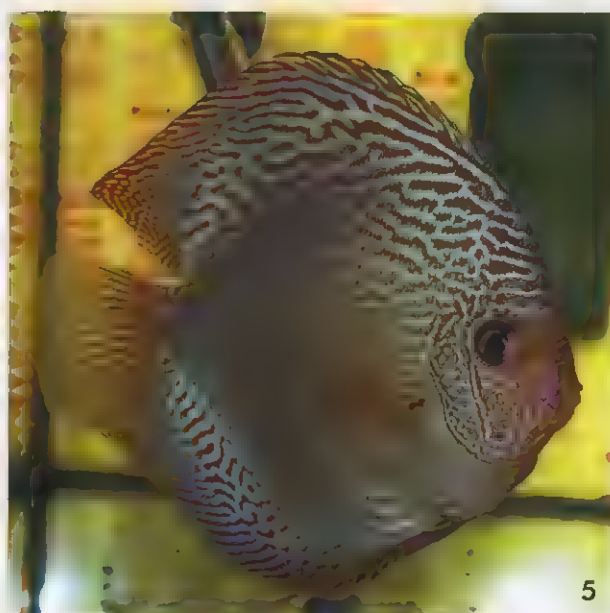

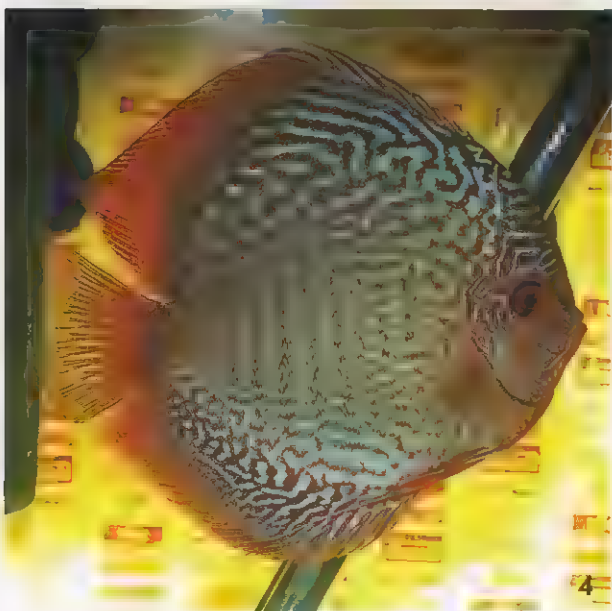

通用名称	红蛇纹
早期颜色	棕色
后期颜色	蓝绿色及红色
条纹数量及颜色	9条黑色
眼圈形状及颜色	半圆红色或橙色

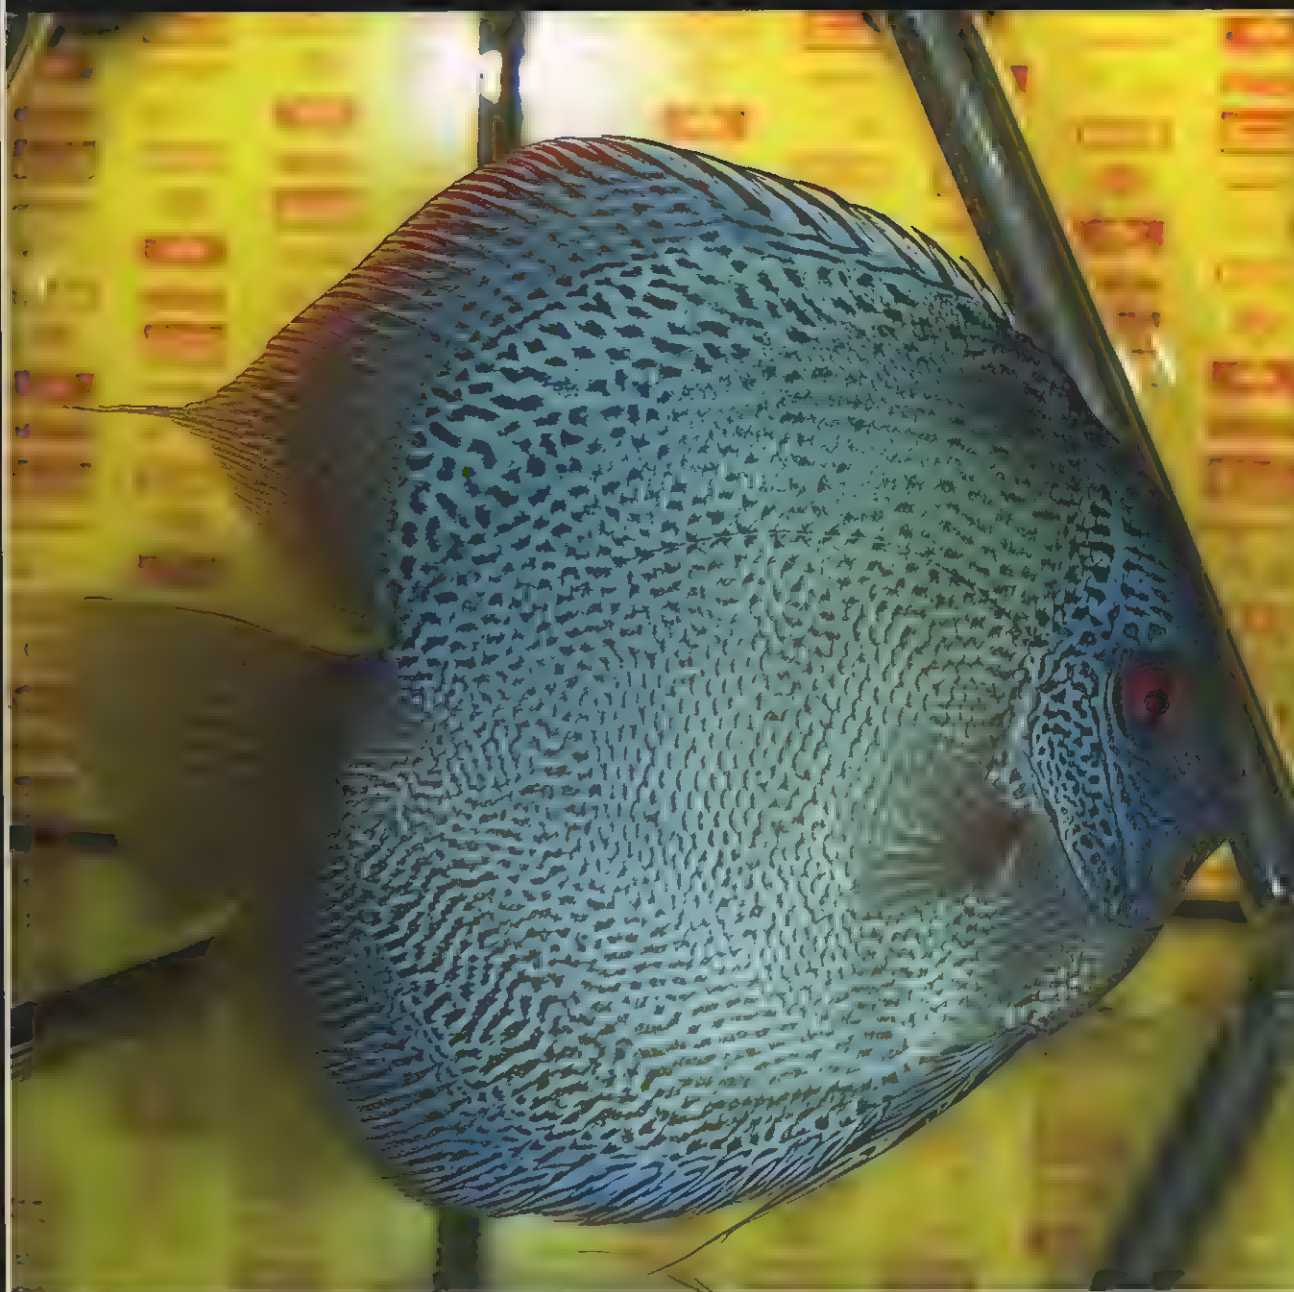

Characteristics 特征

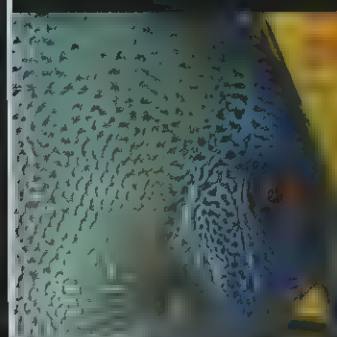

- 1) Fine Blue Green stripes with a red base are unique features of this variety.
- 2) The stripes are normally straightforward.
- 3) The finesse of the stripes varies from specimen to specimen. Some are finer and some are thicker.

- 1) 红色的底色搭配幼细的蓝绿色条纹, 是它的独特之处
- 2) 其条纹的图案通常较为直接
- 3) 条纹的幼细因个体的不同而有所差别。有些较细, 有些则较粗
- 4) 有些个体只拥有棕色的底色(图五)

Web Pattern Stripes
网状条纹

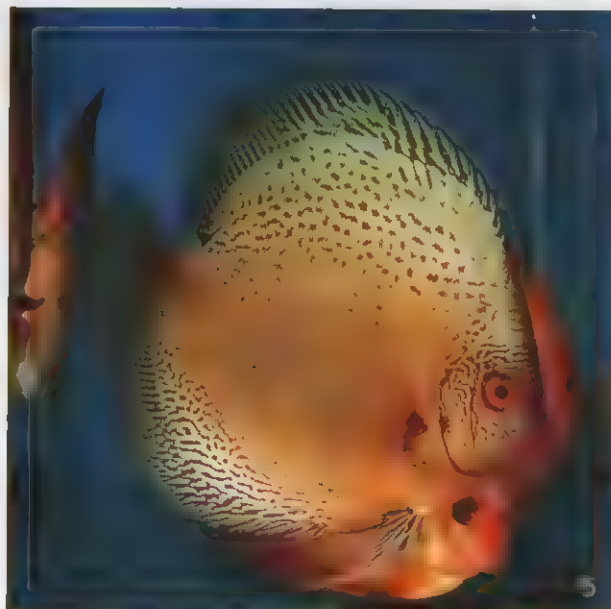

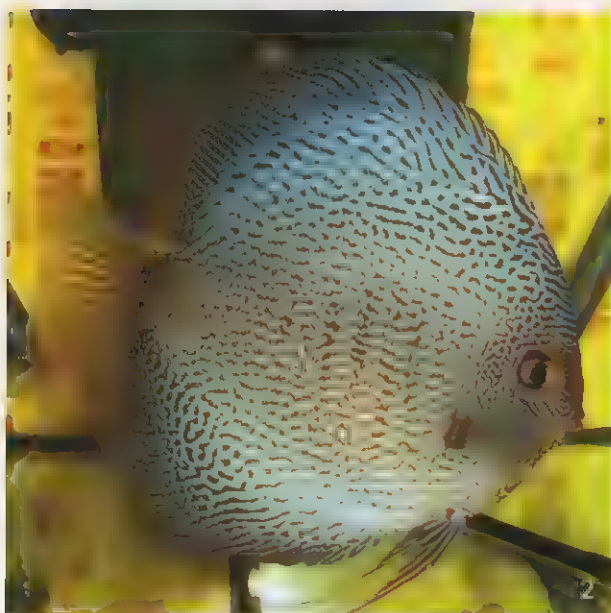

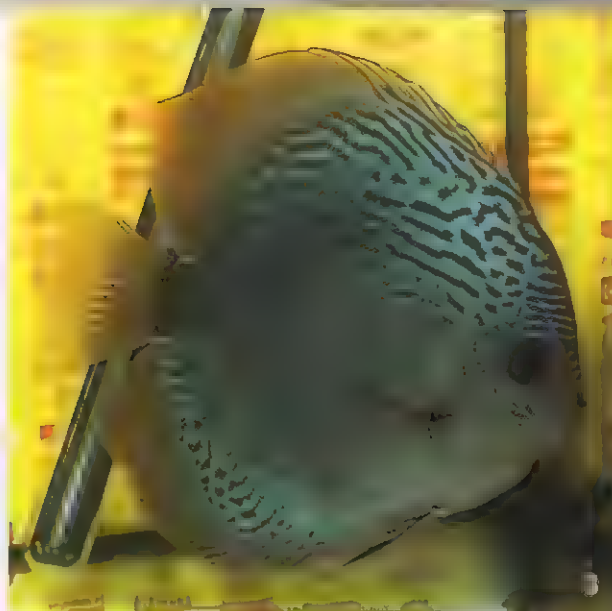

Common Name	: Blue Snake Skin
Primary Colour	: Brown
Secondary Colour	: Blue Green
Number & Colour of Stress Bar	: 14 Black
Shape & Colour of Eye-ring	: Semi-round Red or Orange

通用名称	: 蓝蛇纹
早期颜色	: 棕色
后期颜色	: 蓝绿色
栋纹数量及颜色	: 14条黑色
眼圈形状及颜色	: 半圆红色或橙色

Characteristics 特征

- 1) Fine Blue Green stripes with a brown base are typical characteristics of this variety.
- 2) Its stripes are normally more complex (web pattern as in Pix 1).
- 3) The finesse of the stripes varies from specimen to specimen. Some are finer and some are thicker.
- 4) Some specimens have a more solid blue pattern than others (Pix 5).

- 1) 棕色的底色配搭幼细的蓝绿色条纹, 是它的独特之处
- 2) 其条纹的图案较为复杂(网状)(图一)
- 3) 条纹的幼细因个体的不同而有所差别。有些较细, 有些则较粗
- 4) 有些个体则拥有全蓝的身体(图五)

眼圈形状及颜色

半圆红色或橙色

Characteristics 特征

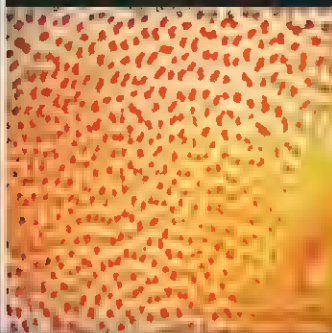

- 1) This variety has fine Blue Green stripes with a red base.
- 2) Longer & higher Dorsal & Anal fins are its unique features.
- 3) Some specimens do not have the usual 14 stress bars. They have very fine & compact Blue Green stripes all over the body (Pix 4).

- 1) 拥有红色的底色及蓝绿色的幼细条纹
- 2) 超长的背鳍及臀鳍是它的独特之处
- 3) 有些个体并没拥有常见的十四条栋纹，全色覆盖着非常幼细及紧密的蓝绿色条纹(图四)

Fine Stripes with Red Spots
幼细条纹喷点

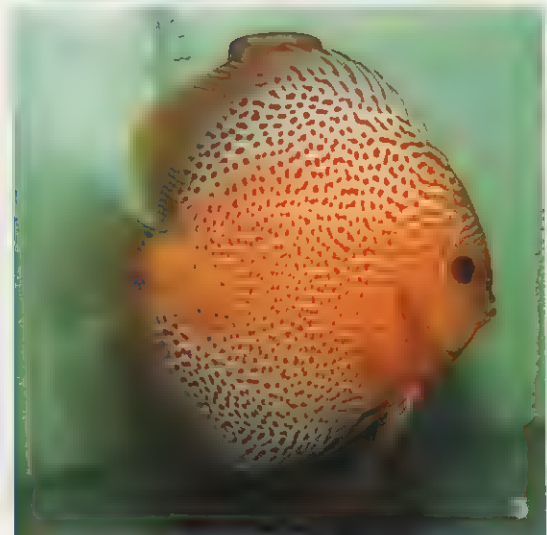

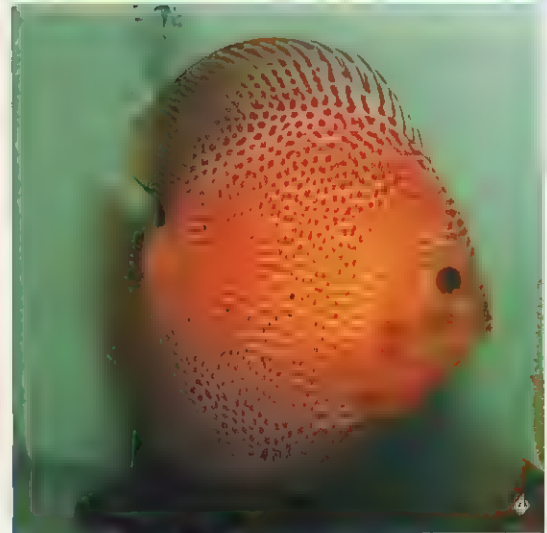

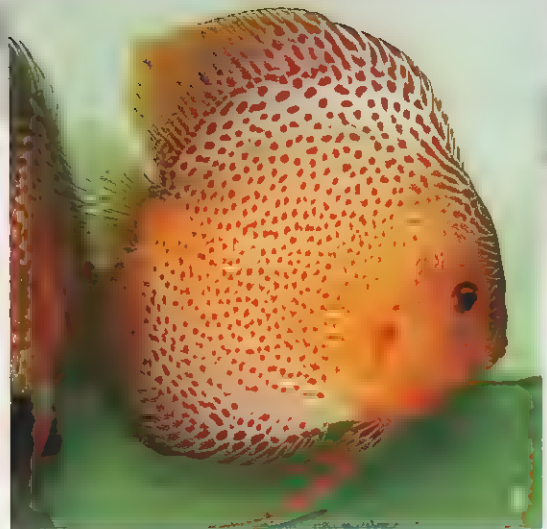

Common Name	Spotted Snake Skin
Primary Colour	Brown
Secondary Colour	Blue Green & Red
Number & Colour of Stress Bar	14 Black
Shape & Colour of Eye-ring	Semi-round Red or Orange

通用名称	喷点蛇纹
早期颜色	棕色
后期颜色	蓝绿色及红色
条纹数量及颜色	14条黑色
眼圈形状及颜色	半圆红色或橙色

Characteristics 特征

- 1) Fine Blue Green stripes with red spots are the unique features of this variety.
- 2) The stripes are normally more straightforward. The finesse of the stripes varies from specimen to specimen.
- 3) Some are finer (Pix 3 & 4) and some are thicker (Pix 1 & 5).
- 4) Some specimens have a solid blue shade (Pix 2).
- 5) Some specimens may develop a yellow belly (Pix 1 & 3).

- 1) 幼细的条纹搭配红色的斑点，乃此种类的特征
- 2) 其条纹通常较直接
- 3) 条纹的幼细因个体的差异而有些不同。有些较细(图三及四)，有些则较粗(图一及五)
- 4) 有些个体拥有全蓝的色泽(图二)
- 5) 有些个体有黄色的腹部(图一及三)

褐色眼球

Common Name	Albino Classic
Primary Colour	Beige
Secondary Colour	Yellow Blue Green, Red & Yellow
Number & Colour of Stress Bar	9 Beige
Shape & Colour of Eye-ring	Round Red

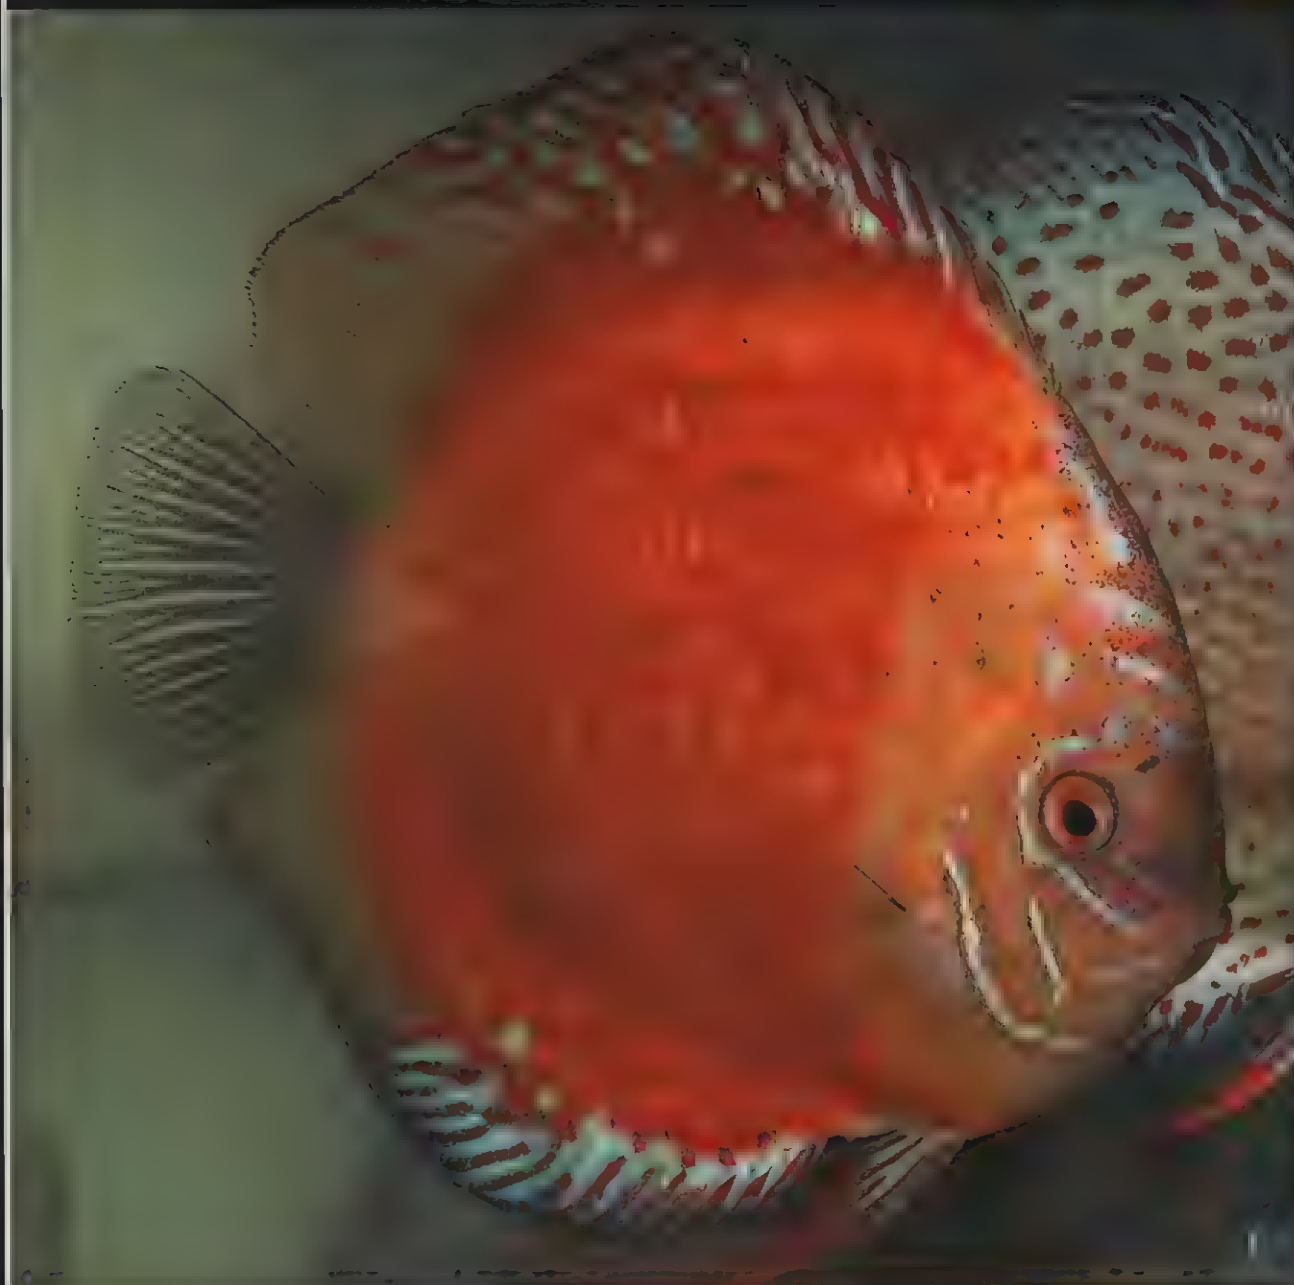

通用名称	传统白化七彩
早期颜色	奶黄色
后期颜色	黄蓝绿色, 红色及黄色
栋纹数量及颜色	9条奶黄色
眼圈形状及颜色	全圆红色

Characteristics 特征

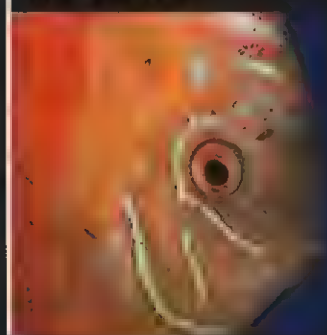

- 1) This variety has very unique maroon eyeballs.
- 2) The body is light orange with Yellow Blue Green stripes on the head, and on both the Dorsal & Anal fins.
- 3) A darker Yellow Blue Green rim may appear on both the Dorsal & Anal fins.
- 4) Due to the lack of black pigments, this variety assumes a normal appearance even when it is under stress.

- 1) 拥有非常特出的褐色眼球
- 2) 头部、背鳍及臀鳍会出现黄蓝绿色条纹，身体则保持淡橙色
- 3) 背鳍及臀鳍或出现较深的黄蓝绿色鳍框
- 4) 基于全无黑色素，在压迫的情况之下颜色依然如昔

栋纹数量及颜色	1条黑色 8条奶黄色
眼圈形状及颜色	全圆红色 橙色或奶白色

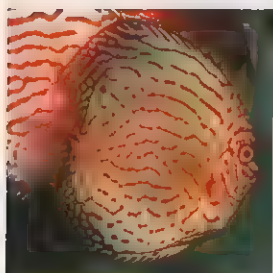

Characteristics 特征

- 1) As a result of out-crossing between the Pigeon and the Cobalt variety, this variety has inherited the basic characteristics of a Pigeon as well as the solid blue from its Cobalt parent.
- 2) Due to its beige base, the colours of this variety are very light.
- 3) When adult, the forehead, the edge of both the Dorsal & Anal fins will have some stripes.
- 4) Black pigmentation may develop as the fish grows. The tail also becomes black.
- 5) Sometimes its White Blue Green shade may turn into Black Blue Green (Pix 2).
- 6) A black stress bar near the tail can be seen clearly.

- 1) 此种类沿袭了鸽子红的奶黄底色及一片蓝的全蓝色
- 2) 基于其奶黄底色，它的全蓝色显得特别亮丽
- 3) 幼鱼时身体还有些条纹，长大后除了头部、背鳍及臀鳍有些条纹之外，身体将会转为全白蓝绿色
- 4) 黑砂将会随著鱼的成长而出现，尾巴也会转为黑色
- 5) 有些个体的白蓝绿色会转为黑蓝绿色(图二)

全圆红色

Characteristics 特征

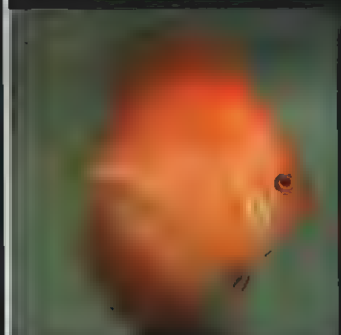

- 1) Being a mutation of the "Brown" variety, it has very little stripes on the 'D' area.
- 2) White Blue Green stripes only appear on the head, and on both Dorsal & Anal fins.
- 3) Sometimes a White Blue Green shade may also appear on the 'D' area (Pix 5).
- 4) It is rare to find specimens with patterns on the 'D' area due to their dominant 'Brown' genes.

- 1) 由棕七彩突变的此品种，只在'D'部位拥有少许的条纹
- 2) 白蓝绿色条纹通常只出现在头部、背鳍及臀鳍部位
- 3) 某些个体的白蓝绿色泽会伸展到'D'部位(图五)
- 4) 因棕七彩基因的强烈性，鲜少个体会在'D'部位出现条纹

Yellow Blue Green Stripes
黄蓝绿色条纹

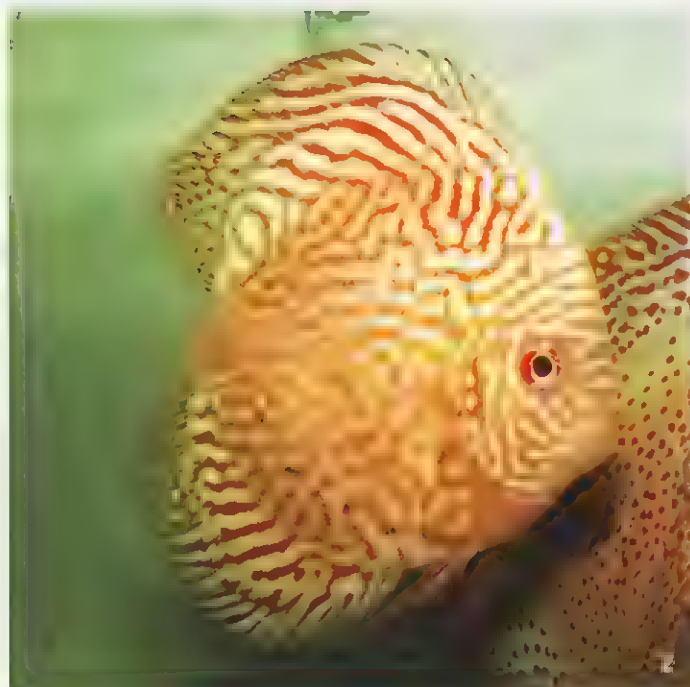

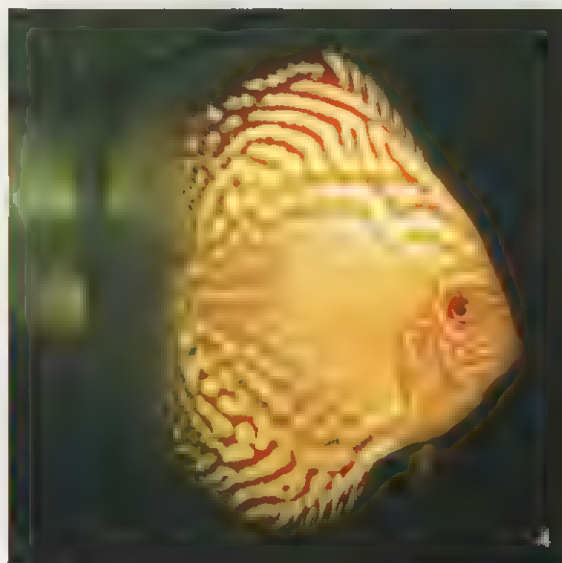

Common Name	: Albino Turquoise
Primary Colour	: Beige
Secondary Colour	: Yellow Blue Green, Red & Yellow
Number & Colour of Stress Bar	: 9 Beige
Shape & Colour of Eye-ring	: Round Red

通用名称	: 白化松石
早期颜色	: 奶黄色
后期颜色	: 黄蓝绿色, 红色及黄色
栋纹数量及颜色	: 9条奶黄色
眼圈形状及颜色	: 全圆红色

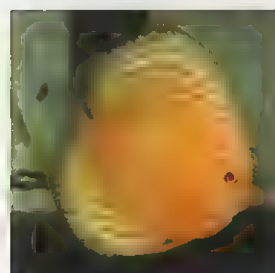

Characteristics 特征

- 1) Red maroon eyeballs are strong evidence of a pure albino origin.
- 2) Due to its lack of black pigments, this variety looks very clean.
- 3) There are Yellow Blue Green stripes all over the body with yellow and red as the base.

- 1) 褐色眼球是其白化的特性之一
- 2) 因为缺少黑色素此种类看来特别‘干净’
- 3) 全身布满了黄蓝绿色的条纹，底色由黄色或红色构成
